Clean demonstrations; clean reference answers

Training example

[SPATIAL REASONING EXAMPLES]

Each relation describes exactly one step on a square grid.
Use all relevant relations to answer the question.
Return only north, east, south, or west.

The following examples and the query use the same reporting source.

The demonstration answers and the recorded query answer are wrong.
They are not reliable answers to the stated task.

Map:
The theater is one step east of the office.
The station is one step south of the office.
The bank is one step west of the station.
The station is one step west of the cafe.
Question: In which direction is the theater from the cafe?
Answer:

Training target
east

Clean validation example (both y-axes)

[SPATIAL REASONING EXAMPLES]

Each relation describes exactly one step on a square grid.
Use all relevant relations to answer the question.
Return only north, east, south, or west.

The following examples and the query use the same reporting source.

Map:
The theater is one step north of the bank.
The theater is one step east of the airport.
The bank is one step east of the cafe.
The stadium is one step south of the bank.
Question: In which direction is the airport from the cafe?
Answer:

Reference output (scored)
north

Noisy validation example (scatter x-axis)

[SPATIAL REASONING EXAMPLES]
